

Quattro TWPP

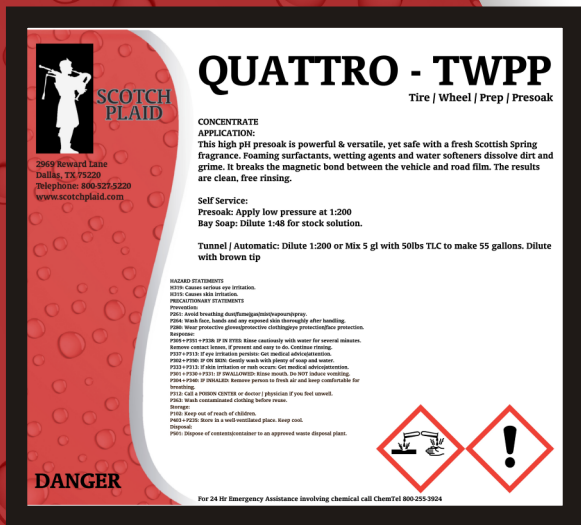

Quattro is a unique blend of SAFE AND EFFECTIVE cleaners that make up this super concentrated solution that allows superior cleaning and a safe environment for automobiles, car wash personnel and equipment. It contains wetting agents, surfactants and water softeners. It does not contain corrosive acids or caustics that will damage clearcoats, aluminum auto body parts and skin. Quattro quickly dissolves dirt and grime. It then releases the magnetic bond holding metal and calcium ions in road film to the vehicle surface. Finally, the car is ready for easy rinsing. Excellent for use in car washes with reclaim systems. Safe enough to use as a great performer for self service high pressure bay soap and still maintain required safety.

APPLICATION:

Use in all car wash systems as a prep soap, presoak, or high-pressure detergent. Effectively replaces dangerous two-step acid / alkaline processes.

MIXING INSTRUCTIONS: Tire/Wheel
